

# Nexus Liquid

Manganese 7.5%

NexusBioAg

## Guaranteed Minimum Analysis

Sulphur (S) ..... 4.0%

Manganese (Mn) (Actual) ..... 7.5%

Ingredients: lignosulfonate, manganese sulphate.

Registration Number: 2009071B Fertilizers Act

**CAUTION:** This fertilizer contains manganese and should be used only as recommended. It may prove harmful when misused.

**DANGER:** Causes serious eye damage. May cause damage to organs through prolonged or repeated exposure.

**Precautionary Statements:** Do not breathe mist or vapor. Wear eye/face protection. **First Aid:** If in eyes: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Immediately call a doctor. **Storage and Disposal:** Do not contaminate water, food or feed by storage or disposal. Keep out of reach of children. Store away from incompatible materials. **Do not freeze.** Dispose of contents/ container in accordance with local regulations.

**DIRECTIONS FOR USE:** Thorough coverage and wetting are needed for optimum foliar spray results. Actively growing plants with young leaves absorb foliarly applied NEXUS LIQUID MANGANESE 7.5% most efficiently. Immediate post-irrigation or post-rainfall application gives the best foliar uptake.

**COMPATIBILITY:** NEXUS LIQUID MANGANESE 7.5% is compatible with most pesticides and fertilizers. However, if the desired combination has not been previously used, a compatibility test is recommended. Add appropriate portions of the materials that you are going to mix, agitate and observe that they are compatible before proceeding. If tank mixing, add components in this order: Water, chemical, Nexus Liquid Manganese 7.5%. **MIXING:** Shake, stir, or swirl contents before using. Always add this product to the spray tank before adding pesticides. **FOLIAR APPLICATION FOR ALL CROPS:** Apply 5L/Ha (2 liters/acre) as needed on a 7-14 day schedule. Avoid foliar applications of this product when plants are under moisture stress. Avoid foliar applications to deciduous tree crops during bloom. Product should be used based on soil or tissue analysis. Seek advice of an agricultural consultant.

**Concentrate Applications:** Use up to 2.5 liters of NEXUS LIQUID MANGANESE 7.5% in a minimum of 250 liters of water per hectare (1 liter/100 liters per acre). **Aerial Applications:** Up to 2.5 liters of NEXUS LIQUID MANGANESE 7.5% per 10 liters of spray per hectare (1 liter per 4 liters per acre) may be used, but more dilute solutions will improve coverage and results.

For more information on use of this product, please contact a professional agricultural consultant. This product should be used on the basis of a soil and/or tissue analysis.

**CONDITIONS OF SALE AND WARRANTY:** Univar Solutions Canada Ltd. warrants that this product conforms to the chemical description on the label and is reasonably fit for the purposes stated when used in accordance with the use directions under normal conditions. The directions for use of this product are believed to be reliable and should be followed carefully. However, it is impossible to eliminate all risks inherently associated with use of this product. Crop injury, ineffectiveness or other unintended consequences may result because of such factors as timing and method of application, weather and crop conditions, presence of other materials, or other influencing factors, all of which are beyond the control of Univar Solutions Canada Ltd. and Seller. Buyer and user acknowledge and assume all risks and liability resulting from the handling and use of this material not in strict accordance with directions given herewith. In no case shall Univar Solutions Canada Ltd. or the Seller be liable for consequential, special, indirect, or incidental damages or losses resulting from the handling or use of this product. The foregoing is a condition of sale by Univar Solutions Canada Ltd. and is accepted as such by the Buyer.
