

## Performance Guarantee

### Foliar Application in Canola

**Envita™ is the ONLY nitrogen-fixing bacteria that works from within the plant cells to fix Nitrogen all season long. It works and we guarantee it!\***

Applied as a foliar spray application in canola, Envita enables cells throughout the plant including foliage and roots to fix their own nitrogen.

**We recognize the only way for you to know how Envita will perform on your farm is for you to try it yourself.**

**Giving farmers an easy, risk-free way to try Envita is why we created the Envita Performance Guarantee.**

A 1 bushel increase in canola yield more than pays for Envita. If you apply Envita on canola, as a foliar application, at the labeled rates and per use guidelines, and don't get a minimum 1 bu/ac increase we'll replace all your product\*.

#### Program details:

- Purchase at least 160 ac of Envita (4 gallons).
- Apply Envita on canola as a foliar application at labeled rates and per use guidelines.
- Leave an appropriate check strip within the same field (minimum of 5 ac, side by side treated area, similar soil type and topography).
- Purchase and apply Envita by July 30, 2021 for use on canola.
- Apply for applications registered in Canada.
- Use a harvest monitor to measure the yield of the Envita treated area and the check area.
- If the harvest monitor does not show at least a 1 bu/ac increase on the Envita treated area vs. the check area, we will replace your Envita product on the field that did not perform for the 2022 season (separate check strips are required on each distinct field Envita is applied).

The Envita Performance Guarantee is also available for corn and other crops. For terms and conditions specific to your area, please contact us at [info@envitasupport.com](mailto:info@envitasupport.com) or call 1-877-ENVITA1 (1-877-368-4821).
