

F-227G

40% Iron

All Crops

Granular Micronutrient

Product Overview

F-227G is a high analysis granular product used for short-term correction of iron deficiency symptoms in plants.

- Proactive prevention of deficiency in the plant is a better agronomic practice than trying to correct chlorosis once it appears.
- An acidic granule for solubilized iron is rapidly changed to insoluble phosphates, carbonates and bicarbonates.

- Essential for plant respiration, photosynthesis, and enzyme reactions in all crops.
- An important component of the enzymes used by nitrogen-fixing bacteria in legume crops.

Application

- Soil application as part of an N-P-K blend.
- 2.5 lbs of product = 1 lb actual.
- Normal bulk blending procedures.
 - Critical Relative Humidity Index (CRHI) must be observed when adding additional products to granular fertilizer blends. For additional CRHI information visit nexusbioag.com.

Agronomic considerations: Prevention of deficiency in the plant is a better agronomic practice than trying to correct chlorosis once it appears.

WARNING

This product will stain sidewalks and pools. It must be swept off before moisture reaches product. This product will "set-up" in storage or in final product.
