

Nitrogen Stabilizer

For applications on the soil surface where volatilization is the challenge.

Active Ingredients

- NBPT 26.7%

Offers Protection Against Nitrogen Loss Caused by:

- Volatilization

Features:

- Added to UAN to become a homogeneous liquid solution.
- Added to UREA to evenly coat and penetrate each granule to the core.
- Used in early spring & fall applications of UREA or UAN.
- Applied pre-plant, side-dressed or used for surface applications.
- Helps to create an efficient nitrogen source for all crops.
- By slowing the urea conversion process to ammonia gas, less nitrogen is lost due to volatilization.

N-Yield CX Rates

FERTILIZER	LITRES/TONNE
Urea	2
UAN	1.5

Benefits of NexusBioAg's Nitrogen Stabilizers

- Select the right stabilizer to protect nitrogen against loss.
- Take advantage of fall applications of nitrogen.
- Insure that your plants have available nitrogen longer into the growing season for optimal yields and protein.
- Using a stabilizer is great insurance to protect your valuable nitrogen investment.
- We can't predict what the growing season will bring, hedge your investment with the proper nitrogen stabilizer.
