

Nitrogen Stabilizer

Surface applied nitrogen is susceptible to 40-80% loss from volatilization.

Offers triple protection against nitrogen loss caused by:

- Volatilization
- Denitrification
- Leaching

NEON nitrogen stabilizers are liquid products that are added to:

- UAN to become a homogeneous liquid solution.
 - Rate: 1.5 L /MT
- UREA to evenly coat and penetrate each granule to the core.
 - Rate: 3 L /MT
- Used in early spring & fall applications of UREA or UAN.
- 17% NBPT & 25% DCD.
- Applied pre-plant, side-dressed or used for surface applications.

Benefits of NexusBioAg's nitrogen stabilizers

- Select the right stabilizer to protect nitrogen against loss.
- Take advantage of fall applications of N.
- Insure that your crop has available N longer into the growing season for optimal yields and proteins.
- Using a stabilizer is cheap insurance to protect your valuable N investment.
- We don't know what the growing season will bring, hedge your investment with the proper N stabilizer.
