

Nexus^{Zinc Sulphate} Granular

Granular Micronutrient

Zn (35.5%) S (18%)

A homogeneous grade of zinc sulphate and zinc oxide with a low analysis to insure a better distribution throughout the fertilizer blend and in the field.

- Optimum water solubility provides excellent plant availability and compatibility with all fertilizer blends.
- Product analysis of 35.5% zinc will supply initial amount of zinc sulphate for immediate plant availability, and zinc oxide for soil buildup and extended plant needs.

Zn
ZINC

- Zinc shortages will result in shortened internodes, stunted plants/leaves, reduced seed set.
- Zinc is necessary for chlorophyll & carbohydrate production.

Application:

- Normal bulk blending procedures.
- Use Nexus Zinc Sulphate Granular to match analysis where higher amounts of zinc are needed.
- Apply in the seed row or in close proximity to the seed row.
- Normally apply at a minimum of 3 lbs. of actual zinc, 8.45 lbs. of product per acre.
- 2.8 lbs. of product = 1 lbs. actual.
